Our Vision.

Be the most comprehensive flight data service provider.

- We are providing a full range high quality flight data analysis service.
- We understand and fulfil the essential task of bridging the important link between the flight data monitoring system and the customer's flight operation.
- We are eager to value different customer requirements by providing tailored service level agreements in order to achieve the highest customer satisfaction. We are providing sound expertise in specific core areas.

Our Mission.

Calculate performance indicators and draw conclusions.

- The customer gathers vital technical and operational key findings about its flight operation.
- We are accomplishing our customer's requirements through effective project management and tailored system solutions.
- We are the subject matter experts and a professional partner for our customers providing a wealth of expertise and experience.

Our Core Values.

Act in concert.

- Highly motivated employees through self-responsibility and encouragement of entrepreneurial behaviour.
- Transparent decision making.
- Socially motivating working environment.

Our Core Business.

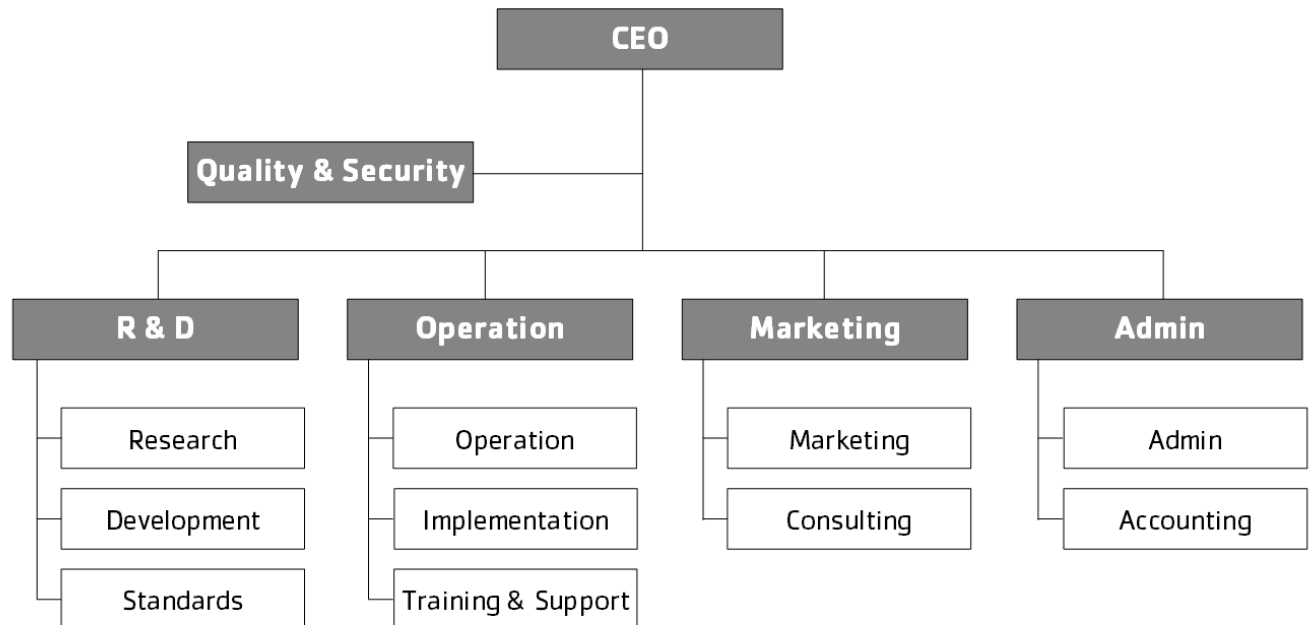

Combine Flight Data analysis with Know-How.

- Flight Data analysis for Flight Safety.
- Flight Data analysis for operational efficiency.
- Flight Data analysis for current research.
