**Flight Data Monitoring**

**Save money and comply to EU-OPS**

EBACE 2009 Geneva, 12-14 May 2009, Hall 6, Booth 668

Dear EBACE guest,

EU/JAR regulations require all commercial aircraft operators with aircraft over 27 tons to capture and monitor flight data. This usually means extra effort and costs to all operators: hardware and software is required plus dedicated staff to process data in order to comply with EU-OPS 1.037 regulations.

swiss49 is a company dedicated to **Flight Data Monitoring, Flight Operation Efficiency and Flight Data Research.**

Why don't YOU just leave this extra work a specialist and concentrate on YOUR core business? Meet us at the EBACE 2009 and learn:

- How you can outsource this compliance to a specialist
- How much money other operators have saved when employing swiss49 – just discover it!
- Understand flight safety events easily with high-quality 3D analysis

We would be pleased to meet you between the **12. – 14. May 2008** at the EBACE in Geneva.

Yours sincerely

Marcel AMHERD  
Owner-Manager
